ANNOUNCEMENT

The Ministry of Finance does not envisage any government securities issue in August 2006.

By end-June 2006 domestic debt totaled BGN 3,023,573.1 thousand in nominal terms. The share of government securities issues in total debt was 86.1 per cent (BGN 2,604,309.3 thousand) and that of government securities issued for structural reform 13.9 per cent (BGN 419,263.8 thousand, Chart 9).

Government securities issued between January and June 2006 amounted to BGN 422,730 thousand. Government securities redeemed in June accounted for BGN 193,473.6 thousand, including short-term bills of BGN 65,000 thousand. As a result of newly issued securities, the share of three-year government securities in the maturity structure of government securities increased to 14.9 per cent, while the shares of all other types of government securities went down (Chart 10). The average-weighted maturity of government securities issues was seven years. Government securities issued for structural reform amounted to BGN 419,263.8 thousand by the end of the review month.

Debt foreign exchange structure experienced certain changes in June (Chart 11). The share of government securities in US dollars and in levs increased to 6.5 per cent and 72.9 per cent respectively, while the share of government securities in euro decreased on May to reach 20.6 per cent. The maturity structure also changed. Short-term government securities were repaid and medium-term government securities increased to 39.8 per cent at the expense of long-term government securities which decreased to 60.2 per cent (Chart 12). Government securities with fixed interest coupons comprised 82.8 per cent and government securities with floating interest coupons 17.2 per cent.

Since early-2006 interest and discounts paid on government securities issued on the domestic market totaled BGN 78,338.3 thousand. Payments on government securities issues amounted to BGN 71,989.1 thousand, or 91.9 per cent of the total repaid interest and discounts (Chart 16). Interest paid on seven-year bonds occupied the largest share, 36 per cent, due to the growing amount of these securities, followed by interest payments on five-year bonds, 30 per cent (Chart 15).

Notes:

As of 1 April 2004 statistical reporting of total government, government guaranteed and consolidated debts has changed. The practice adopted as of January 2003 of reporting bond obligations at acquisition value has been discontinued. After the change, securities included in the stock of domestic and external debt are reported at nominal value.

The IMF extends its tranches to the central bank which then on-lends them to the government under Article 45 of the Law on the BNB. So far, the credits extended by the BNB to the MF are reported as domestic government debt to the BNB, on the one hand, and external debt of the BNB to the IMF, on the other hand.

In the *Government Debt Management* bulletin, debt to the IMF is included in the external debt structure and excluded from domestic debt structure in order to avoid any mistakes in using debt information.

Debt recalculation in US dollars and euro is based on BNB exchange rate of the relevant currency against the lev for the last business day of the respective period.
