- Notes:**
1. As of 1 April 2004 statistical reporting of total government, government guaranteed and consolidated debts has changed. The practice adopted as of January 2003 of reporting bond obligations at acquisition value has been discontinued. After the change, securities included in the stock of domestic and external debt are reported at nominal value.
 2. The IMF extends its tranches to the central bank which then on-lends them to the government under Article 45 of the Law on the BNB. So far, the credits extended by the BNB to the MF are reported as domestic government debt to the BNB, on the one hand, and external debt of the BNB to the IMF, on the other hand.
 3. In the *Government Debt Management* bulletin, debt to the IMF is included in the external debt structure and excluded from domestic debt structure in order to avoid any mistakes in using debt information.
 4. Debt recalculation in US dollars and euro is based on BNB exchange rate of the relevant currency against the lev for the last business day of the respective period.
