Issuing Policy of the Ministry of Finance for 2005

In 2005 the Ministry of Finance will continue to pursue a flexible and adequate issuing policy meeting the specific needs of debt instrument market and complying with its changing conditions.

The Ministry of Finance has announced only a general framework of scheduled debt issues in 2005; a particular monthly calendar will be provided no later than 30 days in advance.

The issuing policy of the Ministry of Finance for 2005 will be based on:

1. the planned deficit in the draft of the 2005 State Budget Law;
2. the need of government securities market maintenance by ensuring sufficient types of securities to build a benchmark curve and issue volumes guaranteeing normal market functioning;
3. the need of intervention in case of worsened external balance of Bulgaria.

In the draft of the 2005 State Budget Law projected deficit amounts to 0.5 percent of GDP, or BGN 170.5 million. Planned privatization revenue comes to BGN 180 million and it will be sufficient to finance it.

Maturing domestic debt in 2005 will total BGN 310 million.

In compliance with the Government Debt Management Strategy and following the existing practice, the Ministry of Finance will act as a preferential borrower on the domestic market. The general framework envisages a government securities issue on an auction principle with a nominal value which will cover the minimum of maturing government securities. The plans of the Ministry of Finance for 2005 include ten- and five-/three-year government securities issues amounting to minimum BGN 150 million. The remaining amount of the fifteen-year issue in euro will be sold in 2005. As regards short-term government securities, the Ministry of Finance will continue issuing the three-month bills. Depending on the market conditions, and where necessary, other government securities may be issued within a year or a longer period.

By end-November 2004 domestic debt totaled BGN 2,627,356.5 thousand in nominal terms. The share of budget deficit financing government securities was 81.9% (BGN 2,151,576.6 thousand) in overall debt and that of government securities issued for structural reform, 18.1% (BGN 475,779.9 thousand) (Chart 13).

Between January and November 2004 issued government securities accounted for BGN 621,493.4 thousand; of this, BGN 22,364.4 thousand were directly sold to individuals. Repaid government securities accounted for BGN 189,412.7 thousand, including BGN 170,170 thousand on short-term treasury bills. As a result of newly issued volumes, the share of seven- and ten-year government securities in the maturity structure of government securities issued for budget deficit financing increased to 29.8% and 12.3% respectively at the expense of all other types of government securities whose shares decreased in November (Chart 14). The average-weighted maturity of government securities issued for budget deficit financing reached six years and five months. By end-November government securities issued for structural reform decreased to BGN 475,779.9 thousand. In the review period USD-denominated ZUNK bonds amounting to USD 123 thousand were used for repayment of obligations to the state under ZUNK and USD 10 thousand were paid for privatization transactions under ZUNK.

In November the forex structure of debt experienced slight changes owing both to government securities issues and effected repayments (Chart 15). The shares of government securities in euro and US dollars decreased to 22.3% and 8.4% respectively, while government securities in levs rose to 69.3%. Debt maturity structure also experienced some changes. Short-term and medium-term government securities decreased to 2.1% and 39% respectively at the expense of long-term securities which rose to 58.9% (Chart 16). Government securities with fixed interest coupons comprised 78.1% and government securities with floating interest coupons, 21.9%.

Since early 2004 repaid interest and discounts on government securities issued in the domestic market have totaled BGN 129,198.9 thousand. Interest and discounts on government securities for budget deficit financing came to BGN 119,747.3 thousand, or 92.7% of the total amount (Chart 19). Interest expenditure on seven-year government bonds occupied the largest share, 34.1%, due to the higher volume of these issues, followed by interest payments on five-year bonds, 32.8% (Chart 18).

Notes:

As of 1 April 2004 statistical reporting of total government, government guaranteed and consolidated debts has changed. The practice adopted as of January 2003 of reporting bond obligations at acquisition value has been discontinued. After the change securities included in domestic and foreign debt are reported at nominal value.

The IMF extends its tranches to the central bank which then on-lends them to the government under Article 45 of the Law on the BNB. So far, the credits extended by the BNB to the MF are reported as domestic government debt to the BNB, on the one hand, and foreign debt of the BNB to the IMF, on the other hand.

In the *Government Debt Management* bulletin, debt to the IMF is included in the foreign debt structure and excluded from domestic debt structure in order to avoid any mistakes in using debt information.

Debt recalculation in US dollars and euro is based on BNB exchange rate of the relevant currency against the lev for the last business day of the respective period.

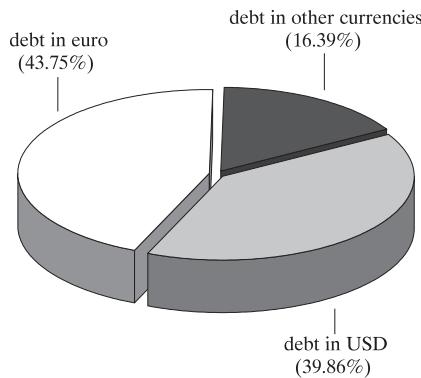

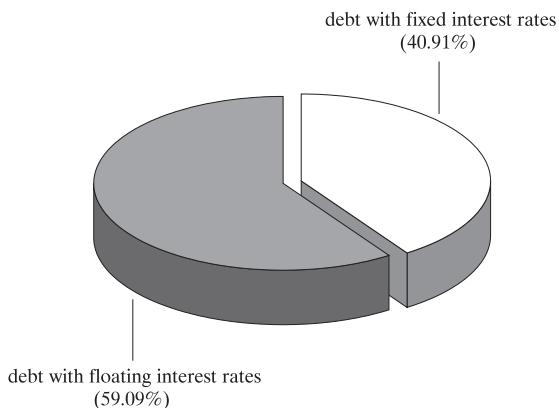

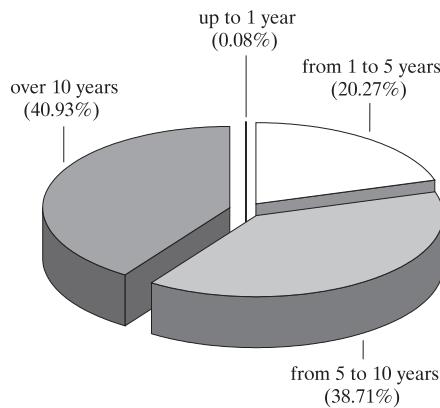

Chart 21

Interest Rate Structure of the Foreign Debt as of 30 November

Residual Term to Maturity of the Foreign Debt as of 30 November

Note: The average-weighted residual term to maturity of the foreign debt is eight years and eight months.

By end-November government and government guaranteed debt totaled EUR 8,016 million, including domestic debt of EUR 1,343.3 million and foreign debt of EUR 6,672.7 million. The decrease in nominal terms was EUR 127.8 million on the previous month due mainly to the effected repayments and exchange rate fluctuations in the review period.

By end-November the debt to GDP ratio was 41.3%, a decrease of 0.6 percentage points on the October 2004 level. The values of the domestic and the foreign debts accounted for 6.9% and 34.4% respectively.

Domestic debt occupied 16.8% in debt structure and foreign debt 83.2% (Chart 23).

By end-November the share of USD-denominated debt comprised 34.6%, EUR-denominated debt 40.2%, BGN-denominated debt 11.6% and that denominated in other currencies 13.6% (Chart 24).

In the structure of foreign debt by type of creditor other bonds (global bonds and eurobonds) occupied the largest share, totaling 25.5%, followed by domestic debt (government securities), 16.8%, and Brady bonds, 14.9%. Obligations to the World Bank comprised 11.8% and to the IMF, 11.2% (Chart 25).

By end-November debt interest rate structure experienced some changes: the debt with fixed interest increased to 47.1% and that with floating interest comprised 52.9% (Chart 26).

Since early 2004 payments effected on government and government guaranteed debt have totaled BGN 2,770.5 million, including domestic debt payments of BGN 357 million and foreign debt payments of BGN 2,413.5 million (Chart 27). In November payments to the IMF and on government investment loans made up the largest share. The bulk of domestic debt payments were made on government securities issued for budget deficit financing.

Between January and November 2004 the forex composition of debt payments suggests that payments in US dollars accounted for the biggest share (recalculated in levs: BGN 1,625.6 million), followed by payments in euro (BGN 508.9 million) and in levs (BGN 357 million, Chart 28).
