BUDGET DEFICIT FINANCING BY GOVERNMENT SECURITIES ISSUES

In August the Ministry of Finance issued through auctions organized by the BNB two government securities issues under Regulation No. 5, including one short-term discount treasury bills issue (No. BG3010903006) and one medium-term (five-year) tap treasury bonds issue (No. BG2030203116). Government securities issued in August included the tap treasury bonds issue opened again in this month.

At the auctions primary dealers' bids totaled BGN 62,160 thousand: BGN 25,010 thousand for three-month and BGN 37,150 thousand for five-year (Chart 1). Approved bids totaled BGN 27,000 thousand nominal value, including three-month of BGN 12,000 thousand and five-year of BGN 15,000 thousand (Charts 2 and 3). Coverage coefficient of the issues approved for sale in August accounted for 2.30: 2.08 on three-month and 2.48 on five-year (Chart 4). Reported excess of demand over supply reflected the stable investors' interest in government securities. Government securities issued in August decreased by BGN 15.04 million on a year earlier basis (Chart 2).

In the review period the yield attained in the primary market reflected both the overall increased demand for government securities and specific preferences for individual debt instruments. The yield of three-month treasury bills slightly increased on the previous month (by 0.04 base points) reaching 2.56%. The yield of five-year bonds rose to 5.13% (Charts 5, 6 and 8).

One 2003 treasury bills issue (BG3010603002) matured in August.

During the period under review two issues of three-year treasury bonds earmarked for direct sale to individuals were put into circulation: issue No. 815 of 6 August 2003 and issue No. 816 of 20 August 2003. Issue No. 815 totaled BGN 557.1 thousand nominal value and issue No. 816 is still in circulation (Chart 11). Three 2001 issues, amounting to BGN 932.8 thousand, matured in August. Over the review period reverse repurchases accounted for BGN 198.4 thousand (Chart 12).

Notes:

Domestic debt based on cash flows.

The IMF extends its tranches to the central bank which then on-lends them to the government under Article 45 of the Law on the BNB. So far, the credits extended by the BNB to the MF are reported as domestic government debt to the BNB, on the one hand, and foreign liabilities of the BNB to the IMF, on the other hand.

In the *Government Debt Management* bulletin, debt to the IMF is included in the foreign debt structure and excluded from domestic debt structure in order to avoid any mistakes in using debt information.

The lev equivalent of the debt denominated in foreign currency is calculated on the basis of the exchange rate of the relevant currency against the lev at the end of month.
