BUDGET DEFICIT FINANCING BY GOVERNMENT SECURITIES ISSUES

In October the Ministry of Finance issued through auctions organized by the BNB three government securities issues under Regulation No. 5, including one short-term discount treasury bills issue (No. BG3011103002) and two long-term (one seven-year, No. BG2040103215, and one ten-year, No. BG2040303211) treasury bonds issues (No. BG2040103215). Issued bonds involved tap treasury bonds opened again in October.

At the auctions primary dealers' bids totaled BGN 162,403 thousand: BGN 15,620 thousand for three-month government securities, BGN 68,030 thousand for seven-year and BGN 78,753 thousand for ten-year (Chart 1). Approved bids totaled BGN 72,000 thousand nominal value, including three-month of BGN 12,000 thousand, seven-year of BGN 30,000 thousand and ten-year of BGN 30,000 (Charts 2 and 3). Bid-to-cover ratio of the issues approved for sale in October accounted for 2.26: 1.3 on three-month, 2.27 on seven-year and 2.63 on ten-year government securities (Chart 4). Reported excess of demand over supply was a result of stable interest in government securities investment. Government securities issued in October decreased by BGN 8.96 million on a year earlier basis (Chart 2).

Notes:

Domestic debt based on cash flows.

The IMF extends its tranches to the central bank which then on-lends them to the government under Article 45 of the Law on the BNB. So far, the credits extended by the BNB to the MF are reported as domestic government debt to the BNB, on the one hand, and foreign liabilities of the BNB to the IMF, on the other hand.

In the *Government Debt Management* bulletin, debt to the IMF is included in the foreign debt structure and excluded from domestic debt structure in order to avoid any mistakes in using debt information.

Debt recalculation in US dollars and euro is based on BNB exchange rate of the relevant currency against the lev for the last business day of the respective period.
